PROFESSIONAL SUMMARY

Aspiring Java Developer seeking an opportunity to apply my skills in core Java, backend development, and database management to build efficient, scalable applications. Eager to contribute to real-world projects and grow in a collaborative, learning-focused environment.

EDUCATION

Vidyavardhaka College of Engineering,

2022 – 2026 | 8.48 CGPA

Bachelor of Engineering CSE(AI & ML)

Relevant Course : Data Structures, Object oriented Programming, Database Management System, Basics of AI, Machine Learning, Deep Learning

SKILLS

Programming Languages

Java, Python, SQL

Frameworks & APIs

Spring Boot, Hibernate, RESTful APIs

Testing

JUnit, Mockito, Unit Testing

Data Science, Analytics & Visualization

Data Preprocessing, Model Development, Predictive Analytics, Pandas, NumPy, Matplotlib, Power BI, Tableau

Soft Skills & Collaboration

Team Collaboration, Team Management, Event Planning, Problem Solving.

Web, Cloud & DevOps Tools

AWS, Docker, Jenkins, Git, GitHub, MySQL, VS Code, Jupyter Notebook

INTERNSHIPS

Data Analyst Intern

Jun 2024 – Aug 2024

Organization: IBM SkillsBuild & CSRBOX

- Developed and integrated a heart disease prediction module into a web application using Python, Scikit-learn, and REST APIs.
- Designed end-to-end data pipeline (ETL to inference) and led a 4-member team following Agile practices and Git-based workflows.
- Focused on backend logic optimization, ensuring accurate real-time risk classification with clean, maintainable code.

PROJECTS

Employee Management System

Java | Spring Boot | Web Application Development

- Developed a robust Employee Management System using Spring Boot to perform efficient CRUD operations.
- Implemented backend logic for employee data handling and database integration.

Tomato Care: Tomato Maturity Prediction & Harvest Recommendation System

Deep Learning | Medical Image Analysis | Computer Vision

- Developed a CNN-based model to classify tomatoes into different maturity stages using tomato fruit images
- Integrated weather and growth-stage analysis to provide intelligent harvest recommendations for maximizing yield and quality.

Pesticide Recommendation System

Machine Learning | Agriculture Analytics | Decision Support System

- Developed a machine learning-based recommendation system to suggest suitable pesticides based on crop type and pest relationships.
- Improved decision-making support for agricultural practices using data-driven predictions.
